🎶 Sublime Sounds — Rhythm Master

Player Guide — Version 2.0 (Multichain Edition)

🎮 What Is Rhythm Master?

Rhythm Master is a music rhythm game where you play tracks from Sublime Sounds Music NFTs and earn token rewards based on your performance.

Your NFTs are your playable tracks. Each NFT can include gameplay boosts, levels, and special media such as video or audio artwork.

The game now supports **multichain play** across:

- WAX
- Polygon

👛 Wallet Login Options

Rhythm Master supports multiple wallet types.

☁ WAX Cloud Wallet

- One-click web login
- Good for most players
- Best desktop compatibility

⚓ Anchor Wallet

- Advanced WAX wallet
- Recommended for experienced users
- Uses on-chain signing

🦊 Polygon (MetaMask)

- Connect with MetaMask
- Used for Polygon NFTs and wSSN rewards
- Mobile users should use MetaMask in-app browser

NFT Requirements

To play Rhythm Master you must own a **Sublime Sounds Music NFT**.

You can acquire NFTs from official drops and marketplaces.

Each NFT track provides:

- A playable music track
- Visual artwork or video
- Possible gameplay boosts
- Level value
- Score and SSN reward modifiers

No payment is required to play — only NFT ownership.

Bridging NFTs Between WAX and Polygon

Rhythm Master supports cross-chain NFT bridging.

WAX → Polygon Bridge

When you bridge an NFT from WAX to Polygon:

- The WAX NFT is **locked**
- A wrapped NFT is **minted on Polygon**
- The Polygon NFT becomes playable
- The WAX version is temporarily not playable

Polygon → WAX Bridge (Return)

When you bridge back:

- The Polygon wrapped NFT is burned
- The original WAX NFT is released
- The NFT becomes playable on WAX again
- It is no longer playable on Polygon

☑ Important Rule

An NFT is only playable on the chain where it currently exists.

There is never simultaneous cross-chain gameplay for the same NFT.

⬡ Polygon NFTs

Polygon NFTs appear automatically when:

- You bridged from WAX successfully
- The wrapped NFT is minted
- The bridge is in minted status

Polygon NFTs:

- Show in your Polygon NFT list
- Load into the game track selector
- Use the same media system as WAX
- Support boosts and levels
- Earn wSSN rewards

🔃 Wallet Scan & NFT List

After login:

1. Click **Re-scan Wallet**
2. The system checks your wallet NFTs
3. Playable NFTs are stored server-side
4. Track list populates

If your NFT does not appear:

- Re-scan wallet
- Confirm NFT is playable type
- Confirm it is not currently bridged away

▶ Starting a Game

1. Login with your wallet
2. Select a track NFT
3. Click **Start**
4. Notes will fall in rhythm lanes
5. Hit keys in time with the beat

🎹 Controls

Default lane keys:

```
D   F   J   K
```

Hit notes as they reach the target line.

Timing accuracy affects:

- Score
- Combo multiplier
- Token rewards

⬜ Scoring System

Score is based on:

- Timing accuracy
- Combo streak
- NFT score boost %
- NFT level

Higher combo = higher multiplier.

Breaking combo resets multiplier.

🚀 NFT Levels & Boosts

NFTs can include gameplay boosts.

Level

Higher level NFTs may provide:

- Increased score potential
- Increased token reward multipliers

Boost Types

Score Boost %

Adds bonus to final score.

SSN / wSSN Boost %

Increases token reward payout.

Boosts are read from NFT metadata and applied automatically.

💰 Rewards

Rewards depend on which chain you are playing on.

WAX Gameplay Rewards

- Earn **SSN**

Polygon Gameplay Rewards

- Earn **wSSN**

Rewards scale with:

- Score
- Combo
- NFT boosts
- NFT level

🎮 Artist Tipping

You can tip artists directly from the game page.

Supported tokens:

- SSN (WAX)
- wSSN (Polygon)

Select:

- Artist
- Token

- Amount

Submit tip.

Cooldown rules may apply to prevent spam.

🎬 Media Types

NFT tracks can include:

Image + Audio NFTs

- Static artwork background
- Audio track plays

Video NFTs

- Video plays when track starts
- Image layer hidden
- Video stops when track ends

Media handling is automatic and chain-agnostic.

📱 Mobile Notes

MetaMask Mobile

- Use MetaMask in-app browser
- External wallet popups may be blocked
- Allow prompts when requested

WAX Mobile

- Some mobile browsers restrict Anchor/WAX popups
- Desktop recommended for best experience

🔁 Restarts

Each track allows limited restarts per session.

Restart counter resets based on game rules.

🛠 Troubleshooting

NFT Not Showing

- Click Re-scan Wallet
- Confirm NFT ownership
- Confirm NFT is not bridged away

Polygon NFT Missing

- Confirm bridge completed
- Confirm wrapped NFT exists in wallet
- Wait for relayer mint confirmation

Cannot Play Track

- Ensure correct chain login
- Ensure NFT exists on that chain
- Re-scan wallet

Wallet Buttons Disabled

- Disconnect wallet
- Reconnect clean
- Refresh page

🔐 Fair Play Rules

- Only owned NFTs are playable
- Bridged NFTs are chain-exclusive
- Burned wrapped NFTs cannot be played
- Scores are server validated
- Rewards are calculated server-side

⬜ Pro Tips

- Higher level NFTs = better rewards
- Maintain combos for multipliers
- Use boosted NFTs for leaderboard runs
- Video NFTs may be more visually demanding — close background apps
- Re-scan after any bridge action
